

AMENDMENTS TO THE CLAIMS

1. (currently amended) An electronic model and data storage system for storing, maintaining and retrieving information relating to the contents of an architectural structure, said system comprising:

a computer device comprising:

a processor; and

a memory device storing executable and associated operational data structures for processing by the processor, said data structures comprising:

a graphical user interface featuring a dimensionally materially accurate electronic ~~3-dimensional sealed~~ model of ~~the current state of~~ a structure with links to data regarding at least one of actual attributes and personal contents of said structure;

~~data structures having~~ electronic links integrated into and displayed on said dimensionally accurate model to provide selective access to information pertaining to ~~one of the~~ said structure's contents, ~~construction materials, and digital photographs,~~ by allowing a user to select ~~with an input device~~ a location on the electronic model of ~~the~~ said structure and to link to said ~~corresponding to an actual surface on the structure to access~~ data regarding ~~the~~ said at least one of real attributes and personal contents ~~and construction materials of the selected portion of said structure;~~

~~the~~ said data regarding ~~the~~ said at least one of real attributes and personal contents of said structure; further comprising warranty and product information

including at least one of dates of installation, terms of warranty coverage and conditions, and maintenance requirements;

an event timing module to monitor maintenance intervals corresponding to said at least one of real attributes and personal contents of said structure and to warn a structure owner prior to expiration of a recommended maintenance interval; and

communication means to contact contractors after receiving authorization from said structure owner to enable a contractor to access said maintenance and warranty information corresponding to said at least one of real attributes and personal contents of said structure ~~for accessing data regarding said structure's contents and construction materials~~ to formulate, bid, and convey a bid back to a said structure owner; and

wherein said data corresponding to ~~the~~ said at least one of real attributes and personal contents of said structure is accessible via a computer network by a said user according to access rights corresponding to said user.

2. (previously presented) The system of claim 1, wherein warranty and product information further comprises at least one of cleaning method information, installer notes and inventory data.

Claims 3 – 28 were previously canceled.

29. (previously presented) The system of claim 1, wherein said computer network is a global information network.

Claims 30 – 33 were previously canceled.

34. (currently amended) The system of claim 1, wherein ~~the~~ said data corresponding to ~~the~~ said at least one of real attributes and personal contents of said structure further comprises information relating to insurance coverage corresponding to at least one of said structure and said contents of said structure.

35. (currently amended) The system of claim 1, wherein ~~the~~ said data corresponding to ~~the~~ said at least one of said real attributes and personal contents of said structure is represented as at least one of textual, menu items and graphical information on said electronic model.

36. (previously presented) The system of claim 1 wherein said system is interactive.

37. (cancel)

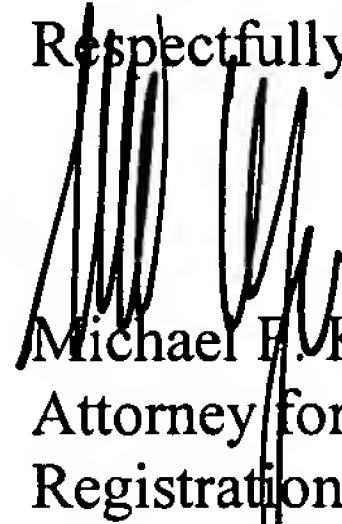

38. (new) The system of claim 1, wherein at least one of said electronic links are selected from the group consisting of icons and menu items selectable by said user.

CONCLUSION

Applicant believes the application is in condition for allowance and respectfully requests the same. In the event there remains any impediment to allowance of the claims that could be clarified in a teleconference, the Examiner is respectfully requested to initiate the same with the undersigned.

DATED this 4 day of ~~July~~^{August}, 2004

Respectfully submitted,

Michael F. Krieger
